

The all new MK5

Over a decade of solving loitering issues worldwide. The original and only sonic loitering solution designed for use with people.

The Mosquito Anti-Loitering device is the most effective method of eliminating loitering issues for residential, commercial and industrial locations. Using a specially designed sonic pulse, Mosquito works by being highly annoying over a period of a few minutes, not by being loud or painful.

2 settings for 2 problems

'Teen' setting. On this setting the sound can be heard only by people under 25 years old*. This will encourage them to leave the area covered within a few minutes but older people will be unaffected as they will not hear the sound.

'All-Age' setting. Some locations experience long term repetitive issues with people who are much older than 25. An increasingly common issue for premises that inadvertently provide shelter from the elements, or a convenient location to camp etc.. The Mosquito can be set to produce the same annoying sound at a lower frequency that people of all ages will hear.

Both settings have proved to be highly effective for over two decades.

Note: 25 years is an average. Some people will lose the ability to hear this frequency at an earlier age and some older people may be able to hear it slightly also, but this is rare.

Main Features

- Low voltage device (24vdc) for straightforward and safe installation
- Supplied with quality dual-voltage (100v to 240v), multi-headed, switch mode power supply with 10 meters of cable
- Bluetooth enabled
- Full set-up and control via MK5 App available on Apple Store and Google Play
- Built-in multi-event timer
- Multiple frequency selection
- Multiple volume selection
- Programmable scheduling
- Multiple inputs for CCTV connection and control

Accessories include

Motion sensor

RF Remote Control

Security cage made from 2mm LASER cut folded galvanised steel

Alternative mounting bracket

Programmable scheduling example - Program Mosquito MK5 to run from 3.30pm until 9pm on the 'Teen' setting at volume 6 and then at 10pm run at 'All-Age' setting at volume 3 until 2am.
